SUMMARY

Full-Stack Developer with 4+ years of experience building scalable web and mobile applications using React, Next.js, Node.js, and Laravel. Delivered 15+ production projects, including e-commerce, job portal, and warehouse management platforms, with several published live on the Google Play Store. Skilled in REST/GraphQL API design and end-to-end development from database to deployed UI.

EXPERIENCE

MERN/Full Stack Developer

January 2025 - October 2025

Spark Zone Technologies · Part-time

Peshawar, Pakistan · On-site

- Engineered scalable web applications using Node.js, Express.js, and Laravel, optimizing server-side architecture and RESTful API performance.
- Spearheaded collaboration with cross-functional teams to implement rigorous testing and deployment protocols, ensuring high code quality.

Full Stack Engineer

January 2022 - Present

Freelance

Remote

- Architected end-to-end web applications using React, TypeScript, and Laravel, while delivering high-performance cross-platform mobile apps with Flutter. Optimized scalable backend systems and managed complex MySQL/PostgreSQL databases to successfully deliver over 15 production-level projects.
- Manage a production Google Play Console developer account ([Play Console Profile](#)) for live mobile apps.

MERN Stack Developer

July 2021 - July 2022

Independent Projects · Self-employed

Remote

- Developed custom SaaS platforms and admin dashboards using the MERN stack and TypeScript, enhancing data management efficiency for various clients.

PROJECTS

LMS - Courses Management System [\[GitHub\]](#) [\[Live Demo\]](#)

Tech Stack: React, Node.js, Express.js, MongoDB

- Full-stack LMS with course creation, enrollment, and progress tracking, using a separate client/server architecture.

Hotel Booking Management System [\[GitHub\]](#) [\[Live Demo\]](#)

Tech Stack: Node.js, Express.js, TypeScript, MongoDB

- Production-ready backend API for a hotel booking system with secure authentication and real-time booking management.

Warehouse Management System [\[GitHub\]](#) [\[Live Demo\]](#)

Tech Stack: Next.js, TypeScript, Prisma, Supabase, Tailwind CSS

- Full-stack warehouse management platform built with Next.js and Prisma, using Supabase for the database and authentication.

Jobz in Canada - Job Portal (Job2Day) [\[GitHub\]](#) [\[Live App\]](#) [\[Website\]](#)

Tech Stack: Laravel, PHP, Blade, MySQL

- Full-featured Laravel job board with job seeker, employer, and admin roles; published live on the Google Play Store as Job2Day.
